

YUYA WATANABE

Data Scientist | Machine Learning | Analytics | Python | SQL

London, UK | y.watanabe1-25@student.lboro.ac.uk | [linkedin.com/in/yuya-watanabe-2531ba193](https://www.linkedin.com/in/yuya-watanabe-2531ba193)

PROFILE

Data scientist with 7+ years of experience delivering analytics, machine learning, and AI solutions across enterprise and applied settings. Strong in Python, SQL, data modelling, feature engineering, model validation, and translating ambiguous business problems into reliable data products and decision-support tools. Experience spans predictive modelling, data quality, reporting, and stakeholder-facing delivery. Currently completing an MSc in Sport Analytics and Technologies at Loughborough University London.

CORE SKILLS

Programming & data: Python (pandas, NumPy, scikit-learn, GeoPandas), SQL, data wrangling, ETL/ELT, feature engineering, data modelling

Machine learning: classification, regression, forecasting, model validation, anomaly checks, synthetic data evaluation

Analytics & reporting: data quality checks, visualisation (matplotlib, Plotly), KPI reporting, dashboard inputs, stakeholder communication

Platforms & tools: Snowflake, AWS (basic), Git / pull-request review, LLM / RAG workflow evaluation

PROFESSIONAL EXPERIENCE

AI Consultant (Part-time) | UNIQUE INDEPENDENCE LTD | London, UK | Feb 2026 - Present

- Review and improve production Python code through pull requests, focusing on readability, refactoring, reliability, and testability.
- Support the design and delivery of retrieval-based AI workflows from requirement definition to MVP.
- Build and evaluate ingestion, chunking, embedding, and retrieval pipelines, with emphasis on correctness and practical adoption.

Data Analyst (Volunteer) | London Samurai Rovers | London, UK | Sep 2025 - Present

- Deliver match and training analysis for weekly decision cycles, aligning questions, data, and reporting outputs with coaches and analysts.
- Built an expected-goals model using logistic regression on event data and produced interpretable outputs including shot maps, timelines, and KPI summaries.

Data Scientist / AI Engineer / Project Lead | NTT DATA GROUP | Tokyo, Japan | Aug 2021 - Sep 2025

- Led enterprise analytics and AI initiatives from problem definition through delivery, including deployment of ChatGPT Enterprise to 38,000 employees as part of Japan's first OpenAI alliance partnership.
- Tracked adoption and usage metrics for governance and decision-making, and delivered workshops and enablement sessions to 500+ users.
- Developed a Snowflake cost-optimisation capability combining usage analysis and actionable recommendations; presented the work at Snowflake Summit.
- Delivered synthetic tabular data generation with utility and privacy checks for regulated stakeholders, enabling safer data sharing and model development.
- Engineered features from location and text-derived data for segmentation, propensity, and forecasting use cases in Toyota Woven City; trained and validated models and translated outputs into decision signals.
- Built and back-tested spatiotemporal flood-prediction models using meteorological and geospatial data; quantified uncertainty and produced decision-support indicators.

Data Scientist | TechnoPro Holdings | Tokyo, Japan | Jan 2020 - Jul 2021

- Led accident-prediction modelling using accident, map, population, and weather datasets, owning data collection, preprocessing, feature engineering, and model development.
- Built a geospatial data mart using GeoPandas and delivered visual prediction outputs using ensemble methods such as LightGBM for integration into a map statistics server.

Production Planning Control Manager | Sumitomo Electric Wiring Systems, Inc. | Tokyo, Japan | Apr 2018 - Dec 2019

- Developed monthly and weekly production plans while coordinating with overseas factories, improving data-driven operational decisions.
- Applied multiple regression and demand analysis to reduce excess inventory and define more efficient stock levels.

EDUCATION

MSc Sport Analytics and Technologies | Loughborough University London | London, UK | Sep 2025 - Sep 2026 (expected)

- Applied coursework using professional sports datasets, with a focus on structured reporting, visualisation, and decision support.

BA International Relations | Yamanashi Prefectural University | Japan | Apr 2013 - Mar 2018

- One-year study abroad experience in London; additional study in English language, literature, and Japan-UK international relations.
